CONTENTS OF VOLUME 1 — 1987

NUMBER 1 — JULY–SEPTEMBER

Editorial: Pharmacological treatment of head injury—a new challenge
Ronald L. Hayes, Henry H. Stonnington and Bruce G. Lyeth 1

Editorial: Developing rehabilitation services for the head injured: a UK perspective
W. W. McKinlay and B. Pentland 3

Return to work within the first seven years of severe head injury
N. Brooks, W. McKinlay, C. Symington, A. Beattie and L. Campsie 5

Paediatric head injuries
John D. Ward and Anthony M. Alberico 21

The effect of seizures on recovery of function following cortical contusion in the rat
Dennis M. Feeney, Brigitte Y. Bailey, Michael G. Boyeson, David A. Hovda and Richard L. Sutton 27

Head injury: the relatives' response
Martin G. Livingston 33

Neuropsychiatric interventions with head injured children and adolescents
Dean X. Parmelee and Gregory J. O'Shanick 41

Naltrexone in organic bulimia: a preliminary report
Allen Childs 49

Pharmacologic treatment of cognitive deficits: a case study
Robert M. Weinberg, Sanford H. Auerbach and Suzanne Moore 57

Post-traumatic epilepsy following head injury
Mary Ann Guidice and Richard C. Berchou 61

Efficacy of an educationally-based cognitive retraining programme for traumatically head-injured as measured by LNNB pre- and post-test scores
Douglas E. Harrington and Dale H. Levandowski 65

A new model of concussive brain injury in the cat produced by extradural fluid volume loading: I. Biomechanical properties
Daniel Stalhammar, Brian J. Galinat, Arletha M. Allen, Donald P. Becker, Henry H. Stonnington and Ronald L. Hayes 73

A new model of concussive brain injury in the cat produced by extradural fluid volume loading: II. Physiological and neuropathological observations
Ronald L. Hayes, Daniel Stalhammer, John T. Povlishock, Arletha M. Allen, Brian J. Galinat, Donald P. Becker and Henry H. Stonnington 93

Subject review: An overview of head injury: its consequences and rehabilitation
Donald R. Vogenthaler 113

NUMBER 2 — OCTOBER–DECEMBER

Editorial: Neurosciences for study of coma
T. Tsubokawa 129

Late psychosocial outcome in severe blunt head trauma
I. Vibeke Thomsen 131

Memory training combined with the use of oral physostigmine
A. McLean Jr, K. M. Stanton, D. D. Cardenas and D. B. Bergerud 145

Ganglioside treatment: reduction of CNS injury and facilitation of functional recovery
S. E. Karpiak and S. P. Mahadik 161

Psychophysiological responses in closed head injury
M. J. Levine, M. Gueramy and D. Friedrich 171

The functional effects of head injury in the elderly
J. A. Wilson, B. Pentland, C. T. Currie and J. D. Miller 183

Needs
Planning a system of care for head injuries
D. C. Burke 189

Opinion
Addressing disciplinary issues in cognitive rehabilitation: definition, training, and organization
J. S. Kreutzer and C. Boake 199

Psychotherapy of the individual with brain injury
S. H. Block 203

Correspondence—Pharmacological treatment of head injury
P. Eames 207

Reply
R. L. Hayes and B. G. Lyeth 207

Book review: Cognitive Rehabilitation of Closed Head Injury Patients: A Dynamic Approach
A. Hickox 210
